

Task 6 - Consuming REST APIs with Fetch/Axios

Objective

To learn API communication using Axios and display API data dynamically.

Tools Used

HTML, CSS, JavaScript, Axios, JSONPlaceholder API

Features

GET API requests, async/await, loading state handling, error handling

Project Workflow

The application fetches user data from the JSONPlaceholder API and displays it in the UI.

Interview Questions

1. Fetch vs Axios
2. What is async/await?
3. How API requests work in JavaScript?

File Name	Purpose
index.html	Main UI structure
style.css	Styling the application
script.js	API communication logic
README.md	Project explanation
